

**Technical Circular 191/ 2018**

**To:** Vessel Owners, Managers, Masters, Officers, Deputy Registrars, Surveyors and Other Interested Parties

**Subject:** Assembly Resolution A.1116(30) on Escape route signs and equipment location markings

**Attachments:**

- Resolution A.1116(30) - Adopted on 5 December 2017 - ESCAPE ROUTE SIGNS AND EQUIPMENT LOCATION MARKINGS
- Resolution A.952(23) - Adopted on 5 December 2003 - GRAPHICAL SYMBOLS FOR SHIPBOARD FIRE CONTROL PLANS

**Date:** 21<sup>st</sup> December 2018

**Summary**

On 1<sup>st</sup> January 2019, Resolution A.1116(30) concerning the escape route signs and equipment location marking will come into force.

The scope is harmonizing the requirements of SOLAS regulations II-2/13, III/9, III/11 and III/20 taking into account the ISO standard 24409 series on 'Design, location and use of shipboard safety signs, safety-related signs, safety notices and safety markings. The resolution incorporates the ISO graphical symbols without any changes.

Applicable to all ships constructed on or after 1 January 2019 and existing ships which undergo repairs, alterations, modifications and outfitting within the scope of SOLAS Chapters II-2 and/or III, as applicable, on or after 1 January 2019, it should be used in conjunction with resolution A.952(23) when drawing up fire control plans.

If you have any comments or if you need assistance, don't hesitate to contact the

ASSEMBLY  
30th session  
Agenda item 9

A 30/Res.1116  
6 December 2017  
Original: ENGLISH

**Resolution A.1116(30)**

**Adopted on 5 December 2017  
(Agenda item 9)**

**ESCAPE ROUTE SIGNS AND EQUIPMENT LOCATION MARKINGS**

THE ASSEMBLY,

RECALLING Article 15(j) of the Convention on the International Maritime Organization concerning the functions of the Assembly in relation to regulations and guidelines concerning maritime safety and the prevention and control of marine pollution from ships,

BEARING IN MIND the requirements of regulations II-2/15.2.4 (Fire control plans), II-2/13.3.2.5.1 (Marking of escape routes), II-2/13.7 (Additional requirements for ro-ro passenger ships), III/9 (Operating instructions), III/11 (Survival craft muster and embarkation arrangements) and III/20.10 (Marking of stowage locations) of the International Convention for the Safety of Life at Sea (SOLAS), 1974, as amended,

RECALLING resolutions A.760(18) on *Symbols related to life-saving appliances and arrangements*, as amended by resolution MSC.82(70), and A.952(23) on *Graphical symbols for shipboard fire control plans*,

RECOGNIZING the need for uniform international symbols to indicate the location of emergency equipment as well as muster stations and that the Assembly had urged Contracting Governments to ensure that the symbols annexed to the aforementioned Assembly resolutions were used, where appropriate,

HAVING NOTED that, through the *Shipboard escape route signs and emergency equipment location markings* (MSC.1/Circ.1553), Contracting Governments had been invited to bring standard ISO 24409-2:2014, which generally conforms to the corresponding symbols set out in the annex to resolution A.760(18) on *Symbols related to life-saving appliances and arrangements*, as amended, and in the annex to resolution A.952(23) on *Graphical symbols for fire control plans*, to the attention of ship designers, shipbuilders, shipowners, ship operators, ship masters, shore-based firefighting personnel and other parties concerned, so that they might use it, on a voluntary basis, for shipboard signage, in compliance with the relevant requirements of SOLAS chapters II-2 and III, pending the adoption of the revised resolution,

HAVING CONSIDERED the recommendations made by the Maritime Safety Committee, at its ninety-eighth session,

1 ADOPTS the *Escape route signs and equipment location markings*, set out in the annex to the present resolution;

2 URGES Contracting Governments to bring the aforementioned escape route signs and equipment location markings to the attention of shipbuilders, shipowners, ship operators, shipmasters, shore-based firefighting personnel and other parties concerned with the safety of life at sea for their use within the framework of SOLAS chapters II-2 and III;

3 REQUESTS the Maritime Safety Committee to keep this resolution under review and to amend it as necessary;

4 INVITES Contracting Governments to note that these escape route signs and equipment location markings should take effect on ships constructed on or after 1 January 2019 or ships which undergo repairs, alterations, modifications and outfitting within the scope of SOLAS chapters II-2 and/or III, as applicable, on or after 1 January 2019, and that they should be used, as appropriate, in combination with resolution A.952(23) for the preparation of the shipboard fire control plans required by SOLAS regulation II-2/15.2.4.

Annex<sup>1</sup>**ESCAPE ROUTE SIGNS AND EQUIPMENT LOCATION MARKINGS**

**IMPORTANT** – The colours represented in this annex can be neither viewed on screen nor printed as true representations. Although the signs and symbols in this annex have been reproduced to correspond (with an acceptable tolerance as judged by the naked eye) to the requirements of standard ISO 3864-4, it is not intended that the signs and symbols shown in this annex be used for colour matching.

For a definitive version of all safety symbols in this annex, please consult standard ISO 7010 and the ISO Online Browsing Platform (<http://www.iso.org/obp/ui/>). For a definitive version of all fire control symbols in this annex, please consult standard ISO 17631. These are the source documents from which to create safety and fire control plans signs.

**1 Normative references**

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 3864 (all parts), *Graphical symbols – Safety colours and safety signs*

ISO 7010, *Graphical symbols – Safety colours and safety signs – Registered safety signs*

ISO 17631, *Ships and marine technology – Shipboard plans for fire protection, life-saving appliances and means of escape*

ISO 17724, *Graphical symbols – Vocabulary*

ISO 24409-1, *Ships and marine technology – Design, location, and use of shipboard safety signs, safety-related signs, safety notices and safety markings – Part 1: Design principles*

**2 Terms and definitions**

For the purposes of this document, the terms and definitions given in standards ISO 17724, ISO 24409-1, and the following apply.

**2.1 Fire control signs**

Signs for specialists, used to identify and locate fire control equipment, not designed according to the rules for safety signs.

Note 1 to entry: These signs are related to the symbols in standard ISO 17631; see 3.1 h) below.

---

<sup>1</sup> This annex is based on the standard ISO 24409-2:2014.

## 2.2 *Image content*

Written description of the elements of a graphical symbol or safety sign and their relative disposition.

[ISO 17724:2003, 38]

## 2.3 *Referent*

Idea or object that a graphical symbol is intended to represent.

[ISO 17724: 2003, 61]

## 2.4 *Safety sign*

Sign giving a general safety message, obtained by a combination of a colour and geometric shape and which, by the addition of a graphical symbol, gives a particular safety message.

# 3 **Categorization of shipboard signs**

3.1 *Signs in this standard are categorized according to their function as follows:*

- a) **MES** – means of escape signs which provide escape route identification.
- b) **EES** – emergency equipment signs which provide use and location of first aid facilities and portable safety equipment.
- c) **LSS** – life-saving systems and appliances signs which provide use and location of life-saving systems and appliances.
- d) **FES** – fire-fighting equipment signs which provide use and location of fire-fighting equipment.
- e) **PSS** – prohibition signs which provide prohibited actions.
- f) **WSS** – hazard warning signs which provide identification of hazards to avoid.
- g) **MSS** – mandatory action signs which provide mandatory notices and instructions.

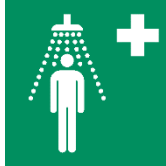

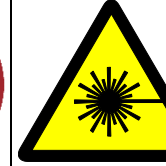

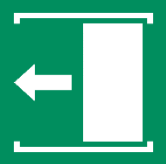

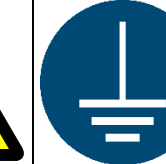

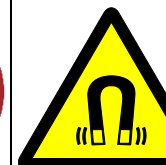

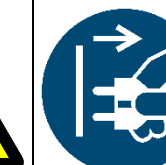

NOTE The PSS, WSS and MSS categories are based on the P, W and M categories of standard ISO 7010.

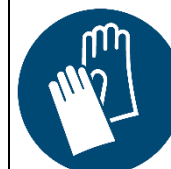

- h) **SIS** – safety and operating instructions for trained personnel.

3.2 Table 1 summarizes the standardized shipboard safety signs used in workplaces and public areas in terms of functional category, referent number, referent, graphical symbol as well as geometric shape and colour.

ASSEMBLY  
23rd session  
Agenda item 17

A 23/Res.952  
25 February 2004  
Original: ENGLISH

**Resolution A.952(23)**

**Adopted on 5 December 2003  
(Agenda item 17)**

**GRAPHICAL SYMBOLS FOR SHIPBOARD FIRE CONTROL PLANS**

THE ASSEMBLY,

RECALLING Article 15(i) of the Convention on the International Maritime Organization concerning the functions of the Assembly in relation to regulations and guidelines concerning maritime safety,

BEARING IN MIND that regulation II-2/15.2.4 of the International Convention for the Safety of Life at Sea (SOLAS), 1974, as amended, requires that fire control plans be permanently exhibited for the guidance of the ship's officers and that a duplicate set of fire control plans or a booklet containing such plans be permanently stored in a prominently marked weathertight enclosure outside the deckhouse for the assistance of shore-side fire-fighting personnel,

RECOGNIZING that the use of international symbols for shipboard fire control plans would greatly increase their usefulness, both for the crew of the ship and for shore-based fire brigades,

RECALLING ALSO resolution A.654(16) on Graphical symbols for fire control plans,

NOTING that ISO had, in close co-operation with IMO, developed standard ISO 17631:2002 – Ships and marine technology – Shipboard plans for fire protection, life-saving appliances and means of escape, providing fire protection symbols which generally conform to the corresponding symbols set out in resolution A.654(16),

NOTING IN PARTICULAR that, through MSC/Circ.1050, Member Governments had been invited to bring standard ISO 17631:2002 to the attention of shipbuilders, shipowners, shipoperators, shipmasters, shore-based fire-fighting personnel and other parties concerned with the preparation or use of shipboard fire control plans, so that they might use it, on a voluntary basis, for the preparation or use of the shipboard fire control plans required by SOLAS regulation II-2/15.2.4, pending the outcome of the work related to the revision of resolution A.654(16),

For reasons of economy, this document is printed in a limited number. Delegates are kindly asked to bring their copies to meetings and not to request additional copies.

HAVING CONSIDERED the recommendation made by the Maritime Safety Committee at its seventy-seventh session,

1. ADOPTS the Graphical symbols for shipboard fire control plans, set out in the Annex to the present resolution;
2. URGES Governments to bring the aforementioned graphical symbols to the attention of shipbuilders, shipowners, shipoperators, shipmasters, shore-based fire-fighting personnel and other parties concerned with the preparation or use of shipboard fire control plans with a view to encouraging their use for the preparation of the shipboard fire control plans required by SOLAS regulation II-2/15.2.4, for ships constructed on or after 1 January 2004;
3. INVITES Governments to bring standard ISO 17631:2002 to the attention of shipbuilders, shipowners, shipoperators and shipmasters so that they may use the additional guidance contained therein for the preparation of shipboard fire control plans;
4. AGREES that ships constructed before 1 January 2004 may continue to carry fire control plans that use the graphical symbols contained in resolution A.654(16);
5. REQUESTS the Maritime Safety Committee to keep this resolution under review and to amend it as necessary.

1.2		B-class division	
1.3		Main vertical zone	
1.4		A-class hinged fire door	<p>The symbol should be at the door position and should show the actual direction of the door.</p> <p>Add <b>WT</b> to the right side of the symbol in the case of a watertight door.</p> <p>Add <b>SWT</b> to the right side of the symbol in the case of a semi-watertight door.</p>
1.5		B-class hinged fire door	<p>The symbol should be at the door position and should show the actual direction of the door.</p> <p>Add <b>WT</b> to the right side of the symbol in the case of a watertight door.</p> <p>Add <b>SWT</b> to the right side of the symbol in the case of a semi-watertight door.</p>

\* A legend of symbols and explanations should be a constituent part of any fire control plan and contain a list of the graphical symbols used in the plan, together with the appropriate explanations, and may include additional special information such as the type of extinguishing media used in fixed fire-extinguishing systems.

No.	Graphical symbol	Reference	Comments on use
1.6		A-class hinged self-closing fire door	<p>The symbol should be at the door position and should show the actual direction of the door.</p> <p>Add <b>WT</b> to the right side of the symbol in the case of a watertight door.</p> <p>Add <b>SWT</b> to the right side of the symbol in the case of a semi-watertight door.</p>
1.7		B-class hinged self-closing fire door	<p>The symbol should be at the door position and should show the actual direction of the door.</p> <p>Add <b>WT</b> to the right side of the symbol in the case of a watertight door.</p> <p>Add <b>SWT</b> to the right side of the symbol in the case of a semi-watertight door.</p>
1.8		A-class sliding fire door	<p>The symbol should be at the door position and should show the actual direction of the door.</p> <p>Add <b>WT</b> to the right side of the symbol in the case of a watertight door.</p> <p>Add <b>SWT</b> to the right side of the symbol in the case of a semi-watertight door.</p>
1.9		B-class sliding fire door	<p>The symbol should be at the door position and should show the actual direction of the door.</p> <p>Add <b>WT</b> to the right side of the symbol in the case of a watertight door.</p> <p>Add <b>SWT</b> to the right side of the symbol in the case of a semi-watertight door.</p>

No.	Graphical symbol	Reference	Comments on use
1.10		A-class self-closing sliding fire door	<p>The symbol should be at the door position and should show the actual direction of the door.</p> <p>Add <b>WT</b> to the right side of the symbol in the case of a watertight door.</p> <p>Add <b>SWT</b> to the right side of the symbol in the case of a semi-watertight door.</p>
1.11		B-class self-closing sliding fire door	<p>The symbol should be at the door position and should show the actual direction of the door.</p> <p>Add <b>WT</b> to the right side of the symbol in the case of a watertight door.</p> <p>Add <b>SWT</b> to the right side of the symbol in the case of a semi-watertight door.</p>
1.12		Ventilation remote control or shut-off	<p>Colour of the circle and a letter at the right side of the symbol should indicate as follows:</p> <p><b>A</b> = blue for accommodation and service spaces;</p> <p><b>M</b> = green for machinery spaces;</p> <p><b>C</b> = yellow for cargo spaces.</p>
1.13		Remote control for skylight	
1.14		Remote control for watertight doors or fire doors	Add <b>WT</b> to the right side of the symbol to indicate remote control for watertight doors or <b>FD</b> to indicate remote control for fire doors.

No.	Graphical symbol	Reference	Comments on use
1.15		Fire damper	<p>Colour of the circle and a letter at the right side of the symbol should indicate as follows:</p> <p><b>A</b> = blue for accommodation and service spaces;</p> <p><b>M</b> = green for machinery spaces;</p> <p><b>C</b> = yellow for cargo spaces.</p> <p>Identification number of the damper may be shown at the bottom of the symbol.</p>
1.16		Closing device for ventilation inlet or outlet	<p>Colour of the circle and a letter at the right side of the symbol should indicate as follows:</p> <p><b>A</b> = blue for accommodation and service spaces;</p> <p><b>M</b> = green for machinery spaces;</p> <p><b>C</b> = yellow for cargo spaces.</p> <p>Identification number of the closing device may be shown at the bottom of the symbol.</p>
1.17		Remote control for fire damper(s)	<p>Colour of the circle and a letter at the right side of the symbol should indicate as follows:</p> <p><b>A</b> = blue for accommodation and service spaces;</p> <p><b>M</b> = green for machinery spaces;</p> <p><b>C</b> = yellow for cargo spaces.</p> <p>Identification number of the damper may be shown.</p>

No.	Graphical symbol	Reference	Comments on use
1.18		Remote control for closing device(s) for ventilation inlet and outlet	<p>Colour of the circle and a letter at the right side of the symbol should indicate as follows:</p> <p><b>A</b> = blue for accommodation and service spaces;</p> <p><b>M</b> = green for machinery spaces;</p> <p><b>C</b> = yellow for cargo spaces.</p> <p>Identification number of the closing device(s) may be shown.</p>

**Graphical symbols for fire-protection appliances**

No.	Graphical symbol	Reference	Comments on use
2.1		Fire protection appliances or structural fire protection plan	
2.2		Remote control for fire pump(s)	
2.3		Fire pump(s)	The type, quantity of water delivered per time unit, and pressure head should be indicated either at the right side of the symbol or in the legend.
2.4		Remote control for emergency fire pump or fire pump supplied by the emergency source of power	
2.5		Emergency fire pump	The type, quantity of water delivered per time unit, and pressure head should be indicated either at the right side of the symbol or in the legend.

No.	Graphical symbol	Reference	Comments on use
2.6		Fuel pump(s) remote shut-off	
2.7		Lube oil pump(s) remote shut-off	
2.8		Remote control for bilge pump(s)	
2.9		Remote control for emergency bilge pump	
2.10		Remote control for fuel oil valves	
2.11		Remote control for lube oil valves	
2.12		Remote control for fire pump valve(s)	
2.13		Remote release station	Indicate at the bottom of the symbol the protected space. Extinguishing media should be colour coded in the lower part of the symbol and be indicated by a letter at the right side of the symbol as follows: grey – <b>CO<sub>2</sub></b> for carbon dioxide or <b>N</b> for nitrogen, brown – <b>H</b> for gas other than CO <sub>2</sub> or N (type of gas to be indicated), white – <b>P</b> for powder, green – <b>W</b> for water.

No.	Graphical symbol	Reference	Comments on use
2.14		International shore connection	
2.15		Fire hydrant	
2.16		Fire main section valve	Indicate the reference number of the valve at the right side of the symbol.
2.17		Sprinkler section valve	<p>Indicate the reference number of the valve at the right side of the symbol.</p> <p>This symbol may also be applied to equivalent water-extinguishing systems.</p> <p>Valves for automatic dry-pipe sprinkler systems should be indicated in the legend.</p>
2.18		Powder section valve	Indicate the reference number of the valve at the right side of the symbol.
2.19		Foam section valve	Indicate the reference number of the valve at the right side of the symbol.
2.20		Fixed fire-extinguishing installation	<p>Extinguishing media should be colour-coded in the centre part of the symbol and indicated by a letter on top of the symbol as follows: grey – <b>CO<sub>2</sub></b> for carbon dioxide or <b>N</b> for nitrogen, yellow – <b>F</b> for foam, brown – <b>H</b> for gas other than CO<sub>2</sub> or N (type of gas to be indicated), white – <b>P</b> for powder, green – <b>W</b> for water.</p>

No.	Graphical symbol	Reference	Comments on use
2.21		Fixed fire-extinguishing battery	Extinguishing media should be colour-coded in the lower part of the symbol and indicated by a letter on top of the symbol as follows: grey – <b>CO<sub>2</sub></b> for carbon dioxide or <b>N</b> for nitrogen, yellow – <b>F</b> for foam, brown – <b>H</b> for gas other than <b>CO<sub>2</sub></b> or <b>N</b> (type of gas to be indicated), white – <b>P</b> for powder, green – <b>W</b> for water.
2.22		Fixed fire-extinguishing bottle, placed in protected area	Extinguishing media should be colour-coded in the centre part of the symbol and indicated by a letter on top of the symbol as follows: grey – <b>CO<sub>2</sub></b> for carbon dioxide or <b>N</b> for nitrogen, yellow – <b>F</b> for foam, brown – <b>H</b> for gas other than <b>CO<sub>2</sub></b> or <b>N</b> (type of gas to be indicated), white – <b>P</b> for powder, green – <b>W</b> for water.
2.23		High expansion foam supply trunk (outlet)	Indicate at the bottom of the symbol the protected space, if necessary.
2.24		Water spray system valves	Indicate at the bottom of the symbol the protected space, if necessary.
2.25		Inert gas installation	
2.26		Monitor	Extinguishing media should be colour-coded in the centre part of the symbol and indicated by a letter on the right side of the symbol as follows: yellow – <b>F</b> for foam, white – <b>P</b> for powder, green – <b>W</b> for water.
2.27		Fire hose and nozzle	Indicate the hose length at the right side of the symbol; where only one type of hose is used, the information can be shown in the legend. Extinguishing media should be colour-coded in the lower part of the symbol and indicated by a letter on the right side of the symbol as follows: yellow – <b>F</b> for foam, white – <b>P</b> for powder, green – <b>W</b> for water.

No.	Graphical symbol	Reference	Comments on use
2.28		Fire extinguisher	Indicate type of extinguishing media ( <b>CO<sub>2</sub></b> for carbon dioxide, <b>F</b> for foam, <b>H</b> for gas other than CO <sub>2</sub> (type of gas to be indicated), <b>P</b> for powder, <b>W</b> for water) and capacity (kg for gas and powder, litres for water and foam) at the right side of the symbol. Media should be colour-coded in the lower part of the symbol as follows: grey for carbon dioxide, yellow for foam, brown for gas other than CO <sub>2</sub> , white for powder, green for water.
2.29		Wheeled fire extinguisher	Indicate type of extinguishing media ( <b>CO<sub>2</sub></b> for carbon dioxide, <b>F</b> for foam, <b>H</b> for gas other than CO <sub>2</sub> (type of gas to be indicated), <b>P</b> for powder, <b>W</b> for water) and capacity (kg for gas and powder, litres for water and foam) at the right side of the symbol. Media should be colour-coded in the centre part of the symbol as follows: grey for carbon dioxide, yellow for foam, brown for gas other than CO <sub>2</sub> , white for powder, green for water.
2.30		Portable foam applicator unit or relevant spare tank(s)	
2.31		Fire locker	Indicate the number of the fire locker at the right side of the symbol. The principal contents of each fire locker should be indicated in the legend.
2.32		Space or group of spaces protected by fire-extinguishing system	Indicate type of extinguishing media ( <b>CO<sub>2</sub></b> for carbon dioxide, <b>F</b> for foam, <b>H</b> for gas other than CO <sub>2</sub> (type of gas to be indicated), <b>P</b> for powder, <b>W</b> for water, <b>S</b> for sprinkler or high pressure water extinguishing system) and capacity (kg for gas and powder, litres for water and foam) at the top of the symbol. Add suffix "L" for fixed local application fire fighting system. Media should be colour-coded in the symbol as follows: grey for carbon dioxide, yellow for foam, brown for gas other than CO <sub>2</sub> , white for powder, green for water, orange for sprinkler or high pressure water extinguishing system.

No.	Graphical symbol	Reference	Comments on use
2.33		Water fog applicator	
2.34		Emergency source of electrical power (generator)	
2.35		Emergency source of electrical power (battery)	
2.36		Emergency switchboard	
2.37		Air compressor for breathing devices	
2.38		Control panel for fire detection and alarm system	
2.39		Push button/switch for general alarm	
2.40		Manually operated call point	The use of this symbol is optional at the discretion of the competent authority.

No.	Graphical symbol	Reference	Comments on use
2.41		Space or group of spaces monitored by smoke detector(s)	The space(s) should be identified.
2.42		Space or group of spaces monitored by heat detector(s)	The space(s) should be identified.
2.43		Space or group of spaces monitored by flame detector(s)	The space(s) should be identified.
2.44		Space monitored by gas detector(s)	

**Graphical symbols for means of escape and escape-related devices**

3.1		Primary escape route	
3.2		Secondary escape route	
3.3		Emergency escape breathing device (EEBD)	Indicate the quantity of the EEBDs stowed at the right side of the symbol.
